

It's time to review your insurance coverage

Even if you've considered or enrolled in Medicare Advantage in the past and decided it wasn't right for you, there may be a plan that's right for you this year. Every year, there are new plans, new benefits, and new types of coverage.

Do you have Medicare Parts A and B only, or Medicare and Medicaid? Medicare Advantage may offer value-based care services such as:

- /// Scheduling support for doctors' appointments
- /// Primary care services
- /// Rewards and incentives for actions you take to care for your health
- /// Additional social needs support like food and transportation

If you have Medicare Parts A and B only, Medicare Advantage plans often provide full coverage including prescription drug coverage, dental, and vision.

If you have Medicare and Medicaid, Medicare Advantage plans offer an out-of-pocket maximum to help save you money.

NOTE: If you do not have a secondary insurance plan, now is the time to take action. There may be secondary insurance coverage options available, so you have more comprehensive coverage. And you may get some added benefits too!

QUESTIONS

We encourage you to talk to an independent, licensed insurance agent, like those at SelectQuote, to compare your insurance plan options and see what may be available to you. As you compare plans and costs, keep in mind it's not just out-of-pocket costs or premiums, it's important to review all costs.
